

Mackenzie Joyce

I am a driven junior full-stack developer looking to enhance the user experience and join a company that will challenge me. In addition to increasing my knowledge and passion for development, I have years of previous work experience that will add value to any role.

PROJECTS

Launch Box: Space Info on the Go

React, Mantine, Third-Party APIs

- This app provides users with up to date information on launches across the world and displays the best opportunities for viewing the ISS based on their current location.

Looking For Coders: A Teamwork Web App

MERN stack, Material UI

- A full-stack web app centered around the user's experience; fulfilling the need for coders to easily find collaborators for personal projects.
- An account must be created to experience all features of the site, including:
 - Inquiring and providing assistance for personal projects;
 - Searching users by their specific coding skills;
 - Viewing user profiles to see their collaborations and social media links.
- **Next steps:** implementing a rating system for collaborator performance.

Backyard Jungle: A Plant-People Forum

Handlebars, Bootstrap, Express, RESTful API

- A full-stack web app offering plant-lovers the space to discuss all things plants in a forum-like setting.
- Restrictions for non-users from creating and commenting on posts.

Conversation Ender: A Text Adventure with Consequences

HTML/CSS, JavaScript

- One of my first projects, this front end web app is a text adventure where the player is put in a vintage-style instant messaging environment.

EXPERIENCE

ListedB

Full Stack Developer | Fall 2022 (Current Position)

- Building the company's website and internal tools.
- Using Agile methodology to organize and prioritize production within and between teams for the upcoming launch date and future features.
- Maintaining and building microservices for easier bug fixes and scalability.

Full Stack Web Development Bootcamp

Full Stack Development Student | Summer 2022

- Rigorous three month coding bootcamp: using a MERN stack, core fundamentals, and best practices in the field.
- Consistently delivered finished, polished projects in a strict time period.

Black Hammock Bee Farms

Social Media Manager | Spring 2022

- Supported the social media accounts and marketing on multiple platforms.
