Mackenzie Joyce

I am a driven entry level front-end developer looking to enhance the user experience with enticing design and meaningful site interactions. I am looking for a company that will challenge me and encourage me to learn more, adding to my overall knowledge.

PROJECTS

Looking For Coders: A Teamwork Web App
MERN stack, Material UI
- A full-stack web app centered around the user's experience, fulfilling the need for coders to easily find collaborators for personal projects.
- An account must be created to experience all features of the site, including:
  - Inquiring and providing assistance for personal projects;
  - Searching users by their specific coding skills;
  - Viewing user profiles to see their collaborations and social media links.
- **Next steps:** implementing a rating system for collaborator performance.

Backyard Jungle: A Plant-People Forum
Handlebars, Bootstrap, Express, RESTful API
- A full-stack web app offering plant-lovers the space to discuss all things plants in a forum-like setting.
- Restrictions for non-users from creating and commenting on posts.

Mix Up Movie Night: Making Your Night-In Amazing
Bulma, JavaScript, movie API
- This front end web app asks the user to choose movie genres and drink preferences to generate the perfect pairing for any at-home movie night.

Conversation Ender: A Text Adventure with Consequences
HTML/CSS, JavaScript
- One of my first projects, this front end web app is a text adventure where the player is put in a vintage-style instant messaging environment.

EXPERIENCE

Full Stack Web Development Bootcamp
Full Stack Developer | Summer 2022
- A rigorous three month coding bootcamp providing experience with the latest technologies, core fundamentals, and best practices in the field.
- Consistently delivered finished, polished projects in a strict time period.

Black Hammock Bee Farms
Social Media Manager | Spring 2022
- Independently maintained the social media accounts and marketing and significantly increased the social media following on multiple platforms.

Inova Fairfax Hospital
Clinician | Spring 2020
- Communicated (verbally and in writing) and interpreted jargon-dense topics to layman interdisciplinary team.
- Maintained calm in a fast-paced, stressful setting.
